

Ako imate problem sa pristupom putem internet **os.html** stranici koju ste postavili na Alasu, problem se rešava na sledeći način.

1. Kada se ulogujete na Alas putem ssh, komandom **ls** izlistajte sadržaj svog foldera.

The screenshot shows a terminal window titled "alas.matf.bg.ac.rs - default - SSH Secure Shell". The terminal displays the following text:

```
mr09043@alas:~$ ls
#1.c#      INBOX.Draft  [redacted]/ [redacted]/ [redacted]/ [redacted]/
#test.cpp# [redacted]/  mail/      [redacted]/ public_html/
mr09043@alas:~$
```

The terminal window includes a menu bar (File, Edit, View, Window, Help), a toolbar with various icons, and a status bar at the bottom showing "Connected to alas.matf.bg.ac.rs" and "SSH2 - aes128-cbc - hmac-md5 - n 80x24".

2. Ako nemate *public_html* folder, kreirajte ga komandom **mkdir public_html**
3. Proverite prava pristupa za *public_html* folder komandom **ls -l**

```
alas.matf.bg.ac.rs - default - SSH Secure Shell

mr09043@alas:~$
```

- Ako prava pristupa nisu *drwxr-xr-x*, promenite ih u navedeni oblik komandom ***chmod 0755 public_html***
- Uploadujte *os.html* u *public_html* folder. Ako ga uploadujete bilo gde drugo, nećete moći da mu pristupite putem interneta.
- Pristupite *public_html* folderu komandom ***cd public_html*** i izlistajte njegov sadržaj komandom ***ls -l***
- os.html* fajl mora da ima prava pristupa podešena na *-rw-r--r--* . Ako prava nisu tako podešena promenite ih komandom.
chmod 0644 os.html
